

## JACK HESS BARICUATRO

Department of Chemistry and Physics

Louisiana State University in Shreveport, Shreveport LA

[Jack.Baricuatro@lsus.edu](mailto:Jack.Baricuatro@lsus.edu)

### EDUCATION

Ph. D. Physical-Analytical Chemistry, Texas A&M University, College Station, TX, 2006

Dissertation: "Electrodeposition of Ultrathin Pd, Co and Bi Films on Well-defined Noble-metal Surfaces: Studies by Ultrahigh Vacuum-Electrochemistry (UHV-EC)"

M. S. Chemistry, University of San Carlos, Philippines, 1997

Thesis: "Isolation and Characterization of Bioactive Metabolites from Red Alga *Halymenia durvillaei* Bory"

B. S. Chemistry, University of San Carlos, 1993, *summa cum laude*

### PROFESSIONAL EXPERIENCE

Assistant Professor, Department of Chemistry and Physics, September 2021 up to the present

Staff Scientist, Joint Center for Artificial Photosynthesis, Caltech, 2014 – August 2021

Senior Post-doctoral Research Scholar, Joint Center for Artificial Photosynthesis, Caltech, 2012–2014

Associate Professor, Department of Chemistry, University of San Carlos, 2010–2012

Assistant Instructor, Department of Chemistry, University of San Carlos, 2009–2010

Post-doctoral Research Associate, University of Washington, 2006–2008

Research Assistant, Electrochemical Surface Science Laboratory, Texas A&M University, 2000–2006

Instructor's Assistant, Department of Chemistry, Texas A&M University, 2002–2004

Teaching Assistant, Department of Chemistry, Texas A&M University, 2000–2002

Lecturer and Laboratory Instructor, Department of Chemistry, University of San Carlos, 1993–2000

Research Associate, Natural Products Research, University of San Carlos, Philippines, 1995–2000

### RESEARCH EXPERIENCE

**Project Lead**, Electrochemical Surface Science of Molecular Transformations, LSUS, USA, August 2021 - present

- Surface coordination chemistry of metal electrodes with electroactive secondary metabolite templates
- Atomically modified “designer electrodes” for environmental applications
- Electrochemical activation of recalcitrant molecules
- Metal- and molecular-sorption capacities of biomass and root systems
- Analytical chemistry of surfaces in ultrahigh vacuum

**Staff Scientist**, Joint Center for Artificial Photosynthesis, Caltech, USA, November 2014 – August 2021

- Surface science of electrocatalysis
- Predictive and diagnostic structure–activity correlations, via *ex situ*, *in situ*, and *operando* surface characterization, in the electrochemical reduction of carbon dioxide and carbon monoxide
- Discovery of heterogeneous multimetallic electrocatalysts for the conversion of carbon dioxide into liquid transportation fuels such as methanol and ethanol
- Regulation of product selectivity by atomic-level structural modification of electrode surfaces

**Senior Post-doctoral Research Scholar**, California Institute of Technology, USA, 2012–2014

- Preparation and surface characterization of electrocatalysts for the three core reactions of artificial photosynthesis: hydrogen-evolution reaction (HER), oxygen-evolution reaction (OER), carbon dioxide reduction reactions (CO<sub>2</sub>RR)
- Electrodeposition and intercalation of layered Mn-based heterogeneous analog of the oxygen-evolving center found in natural photosynthetic organisms
- Heterogenization, via surface immobilization, of homogeneous HER catalysts

**Project Lead**, Natural Products Research Group, University of San Carlos, Philippines, 2009–2012

- Multidepartmental research grant approval that funded and recognized the Research Group as part of the Commission on Higher Education-Philippine Higher Education Network
- Isolation, purification, and characterization of natural products with high hypoglycemic, antioxidant, antimicrobial, and antimutagenicity potentials from indigenous terrestrial and marine resources of Cebu
- Conceptualization and administration of capability-development workshops for university and high school student researchers in solvent-solvent extractions, chromatographic separations, brine-shrimp assays and metal adsorption isotherms on biomass

**Post-doctoral Research Associate**, University of Washington, USA, September 2006–November 2008

- Energetics and surface structure of metals on semiconducting polymer surfaces of interest in photovoltaic and photoelectronic devices
- Single-crystal microcalorimetry and ion-scattering spectroscopy for the determination of heat of adsorption, growth mode, sticking probability of metals on (a) organic films, *viz.* polyfluorenes and poly(3-hexylthiophene); (b) well-characterized oxide supports ( $\text{CeO}_2$ )

**Research Assistant**, Electrochemical Surface Science Laboratory, Texas A&M University, USA, 2000–2006

- Electrochemical surface science of ultrathin metal films on well-defined metal electrodes for (a) hydrogen fuel-storage (b) magneto-optical information-storage devices, and (c) biocompatible fuel cells and “green chemistry” applications.
- Chemisorption and surface redox chemistry of organic molecules on noble metal surfaces
- Broad experience in operating ultrahigh vacuum electrochemical (UHV-EC) systems equipped with traditional electrochemical techniques in combination with low-energy electron diffraction (LEED) spectrometer for surface crystallography; Auger electron spectrometer (AES) for surface composition; X-ray photoelectron spectroscopy (XPS) for oxidation-state assay of surface species; and quadrupole mass spectrometer for residual gas analysis and temperature-programmed desorption analysis.

**Research Associate**, Natural Products Research, University of San Carlos, Philippines, 1995–2000

- Antibacterial, fungal, larvicidal, and acaricidal screening of tropical plant and algal extracts
- Spectroscopic analyses (FTIR, C-13 NMR, H-1 NMR, UV-VIS) for structural elucidation of isolates

## TEACHING EXPERIENCE

*Louisiana State University Shreveport, Shreveport, LA*

- **BS Chemistry Program:** Instrumental Analysis • Analytical Chemistry • Physical Chemistry • Biochemistry
- **Service Courses:** General Chemistry • Physical Science

*University of San Carlos, Philippines*

- **Master's Program in Chemistry:** Physical Organic Chemistry • Selected Topics in Physical Chemistry
- **BS Chemistry Program:** Environmental Chemistry • Physical Chemistry I (Chemical Thermodynamics) and II (Kinetics and Chemical Equilibrium) • Organic Chemistry I, II and III • Chemical Instrumentation in Analytical Chemistry • General Chemistry I and II • Chemical Calculations • Research Problems I and II.
- **Service Courses:** General Chemistry for Engineers. General Chemistry for Science and Mathematics Education

*Texas A&M University, College Station, TX, as TA and Instructor's Assistant*

- **BS Chemistry Program:** Physical Chemistry I and II Laboratory • Quantitative Analysis Laboratory
- **Service Lab Courses:** General Chemistry I and II • General Chemistry for Engineering Students • Molecular Science for Citizens

## AWARDS

George A. Khoury, Jr. Endowed Super Professor in Space Science, Fall 2022 - present

*Distinguished Graduate Student Award*, The Association of Former Students of Texas A&M University, 2004

## AFFILIATIONS

Chair, Northwest Louisiana American Chemical Society, Jan. 2022 – Dec. 2022; Jan. 2024 – Dec. 2024  
Member, American Chemical Society  
Member, Philippine-American Academy of Science and Engineering  
Member, Phi Lambda Upsilon (National Chemistry Honor Society)

## STUDENT PROJECTS AND PRESENTATIONS

### Projects

#### *Spring 2022*

Jayden Williams. Electrochemical annealing of gold electrodes in neutral electrolyte solutions  
 Michael Minameyer. Complexometric interactions of malachite green and arsenic(III)  
 Tiffiny Longstratt. Development of an instructional video on the law of definite proportions

#### *Fall 2022*

Carl Lindsey. Arsenic-binding capacity of *Salvinia molesta* biomass

#### *Fall 2023*

Kevin Brown. Waste-to-chemical upcycling of urea at electrified Au/solution interfaces  
 Jonnae Norals. Solvent-solvent extraction of cuproine perchlorate

#### *Spring 2024*

Kevin Brown. Waste-to-chemical upcycling of urea at electrified Au/solution interfaces  
 Colton James. Voltammetric activation of aqueous cyanate ions at gold surfaces  
 Jeremy Gill. pH and perchlorate ion concentration of aqueous extracts of soil from Colfax, LA

#### *Summer 2024*

Kevin Brown. Waste-to-chemical upcycling of urea at electrified Au/solution interfaces  
 Jeremy Gill. pH and perchlorate ion concentration of aqueous extracts of soil from Colfax, LA

#### *Fall 2024*

Kevin Brown. Waste-to-chemical upcycling of urea at electrified Au/solution interfaces  
 Carl Lindsey. Adsorption isotherms of *Salvinia molesta* biomass in methylene blue solutions  
 Jeremy Gill. pH and perchlorate ion concentration of aqueous extracts of soil from Colfax, LA  
 Tyler Christie. Green alternatives to the solvent extraction of ferroin perchlorate

### Presentations

Kevin Brown. Waste-to-chemical upcycling of urea at electrified Au/solution interfaces. 9th LSUS Regional Student Scholars Forum, April 5, 2024

Colton James. Voltammetric activation of aqueous cyanate ions at gold surfaces. 9th LSUS Regional Student Scholars Forum, April 5, 2024
